How to Install Electrical Flashing

(before WRB)

IMPORTANT: Always refet to house wrap or building paper manufacturer's guidlines

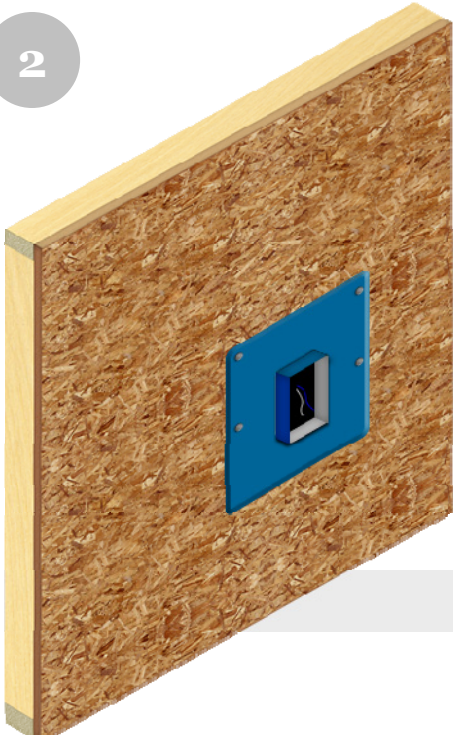

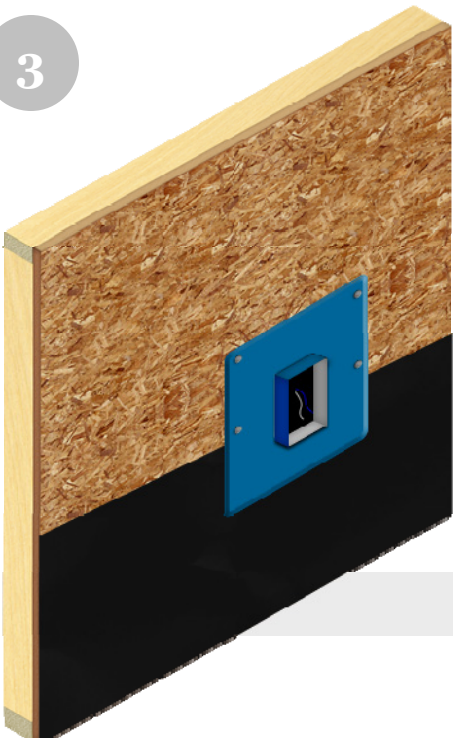

1

Slide Quickflash® panel onto electrical box firmly pressing panel against the wall or studs.
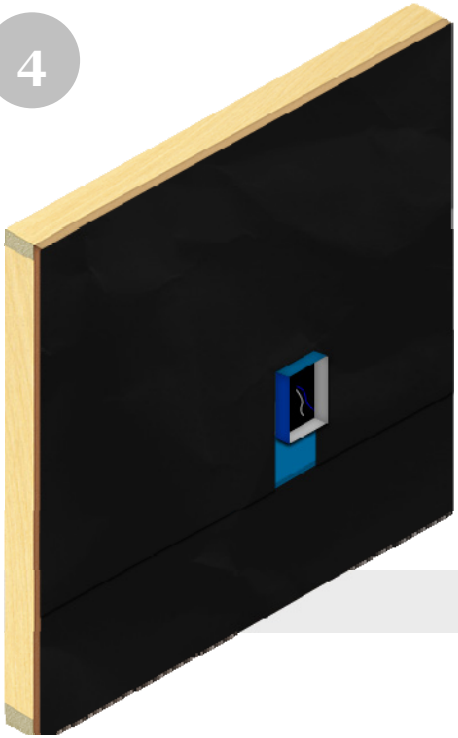

2

Using non-corrosive fasteners, secure the Quickflash® panel to the structure from the mid-point of the panel to the top.

3

Slide the weather resistant barrier underneath the Quickflash® panel to the bottom of the electrical box.

4

Install the weather resistant barrier carefully cutting an opening around the protruding electrical box, over the top of Quickflash® panel using shingle style method extending to the bottom of flashing panel or further.
